

Smart AI-Based Resume Screening System

Project Overview

The Smart AI-Based Resume Screening System is designed to automate the initial process of candidate evaluation. The system analyzes resumes and extracts important information such as technical skills, educational qualifications, work experience, and relevant keywords.

Using Natural Language Processing and machine learning techniques, the system compares candidate profiles with job requirements and generates a relevance score. This helps recruiters identify suitable candidates more efficiently while reducing manual screening effort.

Key Features

- Automated resume analysis
- Skill and keyword extraction
- Candidate ranking
- Job-description matching
- Faster recruitment workflow

Technology

Python, Machine Learning, Natural Language Processing, and Web Technologies.
